Furnace Audits and Surveys

The services that PCS provide, generally result in improved process capacity, an increase in operational efficiency and a reduction in maintenance requirements.

Training

PCS provides Operator Training Programmes that lead to improved combustion performance. These programmes assist with the setting up of good "housekeeping" practises. The Training Programmes combine theoretical tuition with on-site practical demonstrations. The unique "Trainer" programme which is offered as part of the PCS Combustion Training courses assist clients with more efficient operational performance. These two day courses are tailored to meet client requirements and take place on site.

Replacement Combustion Equipment Components and Tiles

PCS is able to supply components for all makes of combustion equipment. These are manufactured in modern works that has had twenty years of experience in the manufacture of combustion components thus ensuring that the highest standards of quality are maintained.

Pre Cast Burner Tiles

PCS supplies high quality pre-cast burner tiles that meet the most demanding furnace conditions.

Combustion Equipment

PCS is able to manufacture new burner equipment at its works in St. Albans. New flare systems and replacement flare tips are supplied through PCS's association with one of Europe's leading providers of integrated flare systems.

Pilot Complete

Low NOx Gas Tips

Pilot Tips

Gas Tips

PCS employs professional combustion engineers who are dedicated to providing combustion solutions by evaluating and recommending the most efficient and hence cost effective solution for the plant operators. On many occasions PCS works with clients in the planning of heater and furnace shutdowns.

Any replacement components are provided well in advance of shutdowns and are manufactured to the highest quality requirements at our manufacturing base in St. Albans.

PCS offers a unique combustion service that crosses the traditional boundaries that have grown up around the suppliers of combustion equipment world wide.
